The challenge of the COST Action 17124 - DigForASP - consists in creating a Network for exploring the potential of the application of Artificial Intelligence and Automated Reasoning in the Digital Forensics field, and creating synergies between these fields. Specially, the challenge is to address the Evidence Analysis phase, where evidence about possible crimes and crimes perpetrators collected from various electronic devices (by means of specialized software, and according to specific regulations) must be exploited so as to reconstruct possible events, event sequences and scenarios related to a crime. Evidence Analysis results are then made available to law enforcement, investigators, public prosecutors, lawyers and judges: it is therefore crucial that the adopted techniques guarantee reliability and variability, and that their result can be explained to the human actors.

Participants from: Poland, Slovakia, Czech Republic, Germany and Hungary.

**Attendance is by invitation only.**

### Formula of meeting:

1. The Action coordinator (or delegate) presents the slides giving an overview of the Action aims, activities and all the different funding opportunities (exchanges, meetings, workshops, etc).
2. Then each group has say about 10 minutes to present 3 or 4 slides describing their areas of interest and research topics. A lunch is offered where people can meet each other more informally.
3. In the afternoon there are more presentations and then a wrap-up discussion where people can start to propose ideas for activities.
